**DETAILED ACTION**

1. Applicant filed amendment dated 11/19/2007 has been entered. Claims 1, 10-11 and 17 are amended and claim 15 cancelled. Currently claims 1-14, 16-20 are pending in the current application.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-14, 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Schaack et al. (US 6,652,283 B1).

Re claims 1-14, 16-20, Van Schaack has been previously discussed in the non-final office action dated June 18, 2007. Applicant has amended the claims to add the limitation of the associated memory retention value which is a specific number measured on a scale. Van Schaack has number of score values associated with memory retention, one for example is shown in Fig 24, where the scores are rated from 1-5. Van Schaack teaches the specific number measure on a scale of memory retention value in col 43, specifically lines 10-20.

***Response to Arguments***

4. Applicant's arguments filed 11/19/2007 have been fully considered but they are not persuasive. Applicant has argued that (although Van Schaack indicates "quantitative measurements" of the memory strength, Van Schaack fails to indicate any numbers relative to a scale to appreciate the quantitative measurements of the memory strength. Accordingly, Van Schaack fails to disclose at least this feature of the memory retention value being a specific number on a scale, as recited in the amended claims. The examiner respectfully disagrees, as cited above in col 43, lines 10-20. Van Schaack teaches of a score rating of 1-5, which is a specific number measured on a scale as amended by the applicant.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
